StarChild Academy

StarChild Academy is not just a school for me; it has been like a second home. The teachers and the faculty members are terrific. They are like my second parents. They are always there for me whenever I need them. I trust them like I trust my parents, and I think mommy and daddy feel the same way, too. Or else, they would not have sent me there. I have been attending this wonderful school since I was two. I have learned and experienced so much during my six years at StarChild Academy.

My parents are very impressed at the result and so are my grandparents and their friends. I could see the proud look in their eyes whenever I do better than their friends' children in games of intelligent involving reading, writing, and arithmetic. And I loved it when grandma asked me to help her with her grammar and spelling.

What I love about StarChild is that they made learning fun. So, you learn things without even realizing it. I was able to read, write, and do simple math before I even attend kindergarten. I could easily read Dr. Seuss while other children are still learning their ABC. I could add and subtract while other children are stilling learning to count from one to ten. I may not know my future, but one thing I know for sure is that the experience and education I received from StarChild Academy will prepare me for it.
