

My Time At StarChild

I have been at StarChild for 4 years and it has been an awesome education. I have learned more than I would have in any other school.

I loved when we learned Music, Math, Social Studies, Reading, P.E., Soccer, Japanese, and Arabic. Now I'm ready to go to 3rd grade.

I love my friends at StarChild Academy. I like to play outside with them. I also love the teachers at StarChild Academy. I also love the teachers at StarChild, they are always teaching us and challenging us.

I have done a lot of projects at StarChild such as an egg drop project where we had to have an egg survive a drop from a two story balcony, made up lyrics to songs and I even learned about Napier's Bones. This means I can now multiply very large numbers without a calculator.

I have learned to be an awesome speller. I can even spell paleontologist. I have learned to play musical instruments such as the drums, bells, recorder, melodica, and have learned about many other instruments.

In conclusion StarChild is an awesome school with a great education program. I am a very lucky person to have gone to StarChild Academy.
