

Aurora Landing

The town is called Aurora Landing. It is located out of the Milky Way on a beautiful planet with an island. There are white sand beaches, black mountains, crystal blue waterfalls, and a spectacular view of the endless sky. There is perfect weather year round. Aurora Landing is not completely ready to accomodate a huge population. Every month a new batch of people come to visit the town. Since the town is new it is like a vacation resort.

Aurora Landing is covered with a glass dome because we can't breathe in space. Trees are planted to provide us with oxygen. This is a green town. All houses are built with recycled materials. The roof is made with a solar panels to help with energy. Every house comes with a hybrid car. Almost everything is recycled and reused. There is an escape shoot to use from coming and going into the town.

There is a mayor to make sure everything runs smoothly. There are contractors that help with building and fixing homes and buildings. There are landscape architects that tend to the foliage. There are jobs for clerks and store managers at the super store. The super store is a place that keeps everyday needs. There is a restaurant for fun dining. They hold jobs for waitors, waitresses, and restaurant managers. There are doctors, nurses, and other technicians that help with minor and major accidents. People at the waste management company take care of the recycling and waste. The trash is burned in the incinerator. They burn the trash to generate energy. They also take care of the human waste. The mayor makes all the rules. The rules are: no littering, no fighting, no climbing on things (only construction workers can), no cutting down trees, no wasting electricity, and no stealing.

Aurora Landing is a great place to get away from everyday issues. It is a place with fine dining with good company, a fully equiped store, and a wonderful hospital. This town gives us the chance to relax and enjoy life.
